The values shown are taken from the outlier analysis data set which means they may vary slightly from the values shown on the NNAP online platform which display the raw values.

**KEY ONLY**

- **Negative outlier (below 99.8% control limit)**
- **Positive outlier (above 99.8% control limit)**
- **Within expected range**
- **Worse than expected (below 97.5% CL)**
- **Better than expected (above 97.5% CL)**

Display of performance boundaries does vary depending on volume of activity. See FAQs for further information.

*Audit recommendation
†Audit recommendation based on specialist guideline
‡ The standard for outlier analysis is the national rate. The aspirational standard is currently 85%, but this is recognised to be aspirational
